## THE ART OF SPREADING LIGHT

The first candlestick from Konstsmide came out more than 70 years ago. It became the original behind the uninterrupted development of exciting models, right up to today's retro-trend. Therefore, it has a special place in the history of the company.

In Konstsmide, we enjoy lighting with style. Therefore, we publish each year a comprehensive catalogue, always filled with exciting news, so that you can choose exactly the style that suits you from our range.

That is because we offer lights for all tastes. From classic wooden candlesticks in red lacquer, to the current models of coloured metal and brass. From stylish golden stars, to our Swedish-made decoration trees. From straightforward light decorations to evolved app controlled light sets.

For us, style means combining brilliant Christmas decorations for the right mood. Please take a look at the images in the introductory spread of the catalogue with an inspirational Christmas spirit.

You can, of course, also illuminate your patio and garden. Light chains with icicles, stars and balls are easy to assemble with our LED 31V systems. In this way all the safe low voltage cables start from the same transformer. If a standard power outlet is not available, you can choose smart, solar, or battery-powered lighting instead.

For those of you who want to create your own winter fairy tale in the garden, we have a great variety of santas, snowmen, bears and other figures. Christmastime is a unique time, so why not make it fun.

All of our lighting have one thing in common: Life after Christmas. If you keep the products in order, you can take them out next Christmas again, and the next and the next...

After many years as the market leader, we know what quality is worth.

Welcome to a bright Christmas at Konstsmide!

# LED – LIGHT EMITTING DIODE

The ideal light source for decorative lighting is small, energy efficient and durable. Three characteristics that are united in one and the same technology, the LED light. Therefore, an overwhelming portion of Konstsmide's decorative lighting now uses efficient LED technology.

LED refers to light emitting diodes or LEDs. No other lamp has such small dimensions as these point shaped small light sources. Miniature form requires optics of the same size and the classic metal reflector is replaced in the LED lights by optics in the plastic around the diode.

With approximately 50,000 hours of operation, LEDs have a very long life, giving the development of lamp design entirely new conditions: The lamps no longer need to be replaced. With LEDs, the fixtures and light source grow old together – both are changed at the same time when the service life is over. There are of course exceptions where it must still be possible to replace a LED lamp.

## UNIVERSAL LIGHT BULB E10

Now you can switch to LED lights in your old lighting. Our universal lamp fits the lamp socket E10; that means, into many existing electric light candlesticks and Christmas tree lights in homes and workplaces.

The E10 lamp of Konstsmide can save up to 97 percent of electricity consumption of an ordinary electric light candlestick while the life expectancy increases ten times compared to conventional bulbs.

You do not need to buy new candlesticks and Christmas tree lights in order to use LED light – but you have to replace all the old bulbs to LED to get the proper function!

LED light supports voltage intervals between 14V and 55V without affecting the glare or the useful life. The same lamp can, therefore, be used in all parallel and series-connected products, from a four armed candelabra to the Christmas tree lights with 16 lights, but also in 24V parallel connected candlesticks.

Some advantages:

- Ten times longer service life.
- Very low power consumption gives reduced electricity costs.
- Ability to create a very large number of colour shades.
- Emits no UV or IR radiation.
- Small format that allows compact luminaires.
- High, functional safety.
- Shock and vibration resistant.
- Low voltage provides increased reliability.
- Limited impact on nocturnal insects outdoors.

## CANDLESTICKS

Electric light candlesticks are being constantly renewed and are now available in more exciting forms than ever; Classic, elegant, fun, and stylish. As the oldest manufacturer of electric light candlesticks, we know what we are doing. During the winter, many houses undergo a lively transformation, and the candlesticks find their rightful place in the windows.

# TRANSFORMER WITH MULTIFUNCTION

A transformer with built-in advanced technology that allows you to switch between different features by a simple push of a button. Multifunction can mean, for example, that you can select specific light modes, colours or brightness. The transformer is included with selected light sets from our latest assortment.

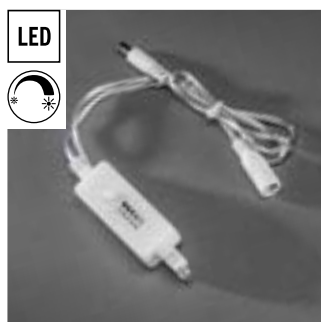

## ACCESSORIES

Timer 6 hours. For LED light sets with 24V indoor transformer. Max 1A=400 LED. Transparent cable. Not compatible with LED light sets that have multi- or app-function.

**3608-013**

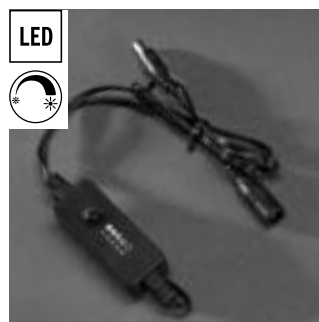

↔ 100 cm  
 20 1,7 kg 9 dm<sup>3</sup>

Dimmer, 5 steps. For LED light sets with 24V indoor transformer. Max 1A=400 LED. Transparent cable. Not compatible with LED light sets that have multi- or app-function.

**3668-013**

↔ 100 cm  
 20 1,7 kg 9 dm<sup>3</sup>

## LIGHT SET OUTDOOR

Christmas decorations in the garden are fun, and the interest is growing every year, just as our selection of lights sets and decorations. We have items you can connect to a 31V LED system, and optional timers allow you to turn them on and off at specific times.

# TRANSFORMER WITH MULTIFUNCTION

A transformer with built-in advanced technology that allows you to switch between different features with a simple push of a button. Multifunction can mean, for example, that you can select specific light modes, colours or brightness.

The transformer is included with selected light sets from our latest assortment.

## APP CONTROLLED LIGHT SETS

Simply download the app and easily set how your Christmas lights will shine!

Konstsmide's app works via Bluetooth for iOS and Android mobile phones. Via the app, you can control eight light sets simultaneously with an iOS and four light sets simultaneously with an Android.

The app has multiple functions:

**MODE:** Choose between 8 modes on how the light set/s should be displayed. Among other things, you can choose between chasing, glowing or twinkling light. Somebody can also choose from a combination mode or static lights.

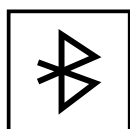

**DIMMER:** Choose the brightness you want on the light set/s.

**TIMER:** Set the time as you wish on the light set/s. It is also possible to vary the time between the different weekdays.

**MUSIC:** Download and play your favourite songs or melodies.

Notice! No music is included with the app.

**FLASH:** Choose between variable or synchronized light on the light set/s.

Android

iOS

ACCESSORIES

Timer 9 hours, that suits LED light sets with 24V outdoor transformer.  
 Not to the 48XX-XXX/49XX-XXX System.

## KONSTSMIDE'S EXTENDABLE LED 31V-SYSTEM

Simple, safe and highly flexible – Konstsmide's LED 31V system is the perfect way to decorate your house and garden!

The system extends up to 1040 LEDs or 100 metres while keeping energy consumption low.

1000 LED's use together less power than one 60W 'classic' light bulb!

Diode

Extra flexible cable

Inside/outside use

Konstsmide's 31V-system

Dimmer

Dusk till dawn sensor

Extra long life

Energy saving

# X-mas Tree 2.0

MADE IN SWEDEN

Far in the dark woods of Småland, Gnosjö Konstsmide saw the possibility to be in harmony with environmental thinking – a metal Christmas Tree was designed, produced to simulate the "traditional" Christmas Tree.

The **X-masTree 2.0** was born. They wanted to bring something unique to the market, something which is made in Sweden with the attributes of simple installation together with customisation to the room.

White coloured metal wire Christmas Tree, complete with top star. 5 strings with amber LED's. Silver coloured cable. Incl. transformer.

## BATTERY OUTDOOR

Christmas lights and light decorations with batteries are perfect if you don't have access to power outlets or if the garden is large and you want to avoid long extension cords. There are smart battery boxes with a built-in timer and a dusk sensor that controls the Christmas tree lights and the garden's atmosphere.

# BATTERY BOX INSTEAD OF A POWER PLUG IN THE WALL!

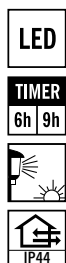

There are many advantages to battery boxes. No more wall outlets and extension cords; placement opportunities are limitless. The battery box is attached to the product and controls its functions. The product can, of course, also be used indoors. Konstsmide has battery products for different purposes.

## Battery box with multifunction, memory and timer.

Battery box with multifunction, where you choose if you want a steady or twinkling light. It also has a built-in 6-hour timer, i.e. it lights 6 hours after the startup time and then turns off automatically. This is repeated the next day at the same time. The battery box can be hidden while retaining function.

## Battery box with dusk till dawn sensor and timer.

Battery box with dusk till dawn sensor and adjustable timer 6 or 9 hours. The light set comes on when it is getting darker and lights then 6 or 9 hours, depending on the time selected. This is repeated the next day when it gets darker. The battery box must not be covered if the sensor is to have the desired function.

This example shows the battery box item no. 3774-100.

The battery box is easy to hang.

All battery boxes have a timer.

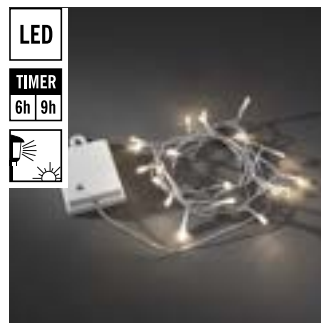

The battery box is easy to open, no tools needed to change batteries or change the function.

Light set with warm white LED's. Black cable. With timer and dusk till dawn sensor, 6 or 9 hours. Batteries not included.

## S O L A R

Christmas lights and light decorations powered by solar cells are perfect if you don't have access to electrical outlets or if the garden is very large and you want to avoid long extension cords. Konstsmide's solar panel with built-in timer and twilight sensor controls Christmas tree lighting and other atmospheric lighting in the garden.

# ENERGY EFFICIENT WITH THE HELP OF THE SUN!

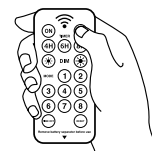

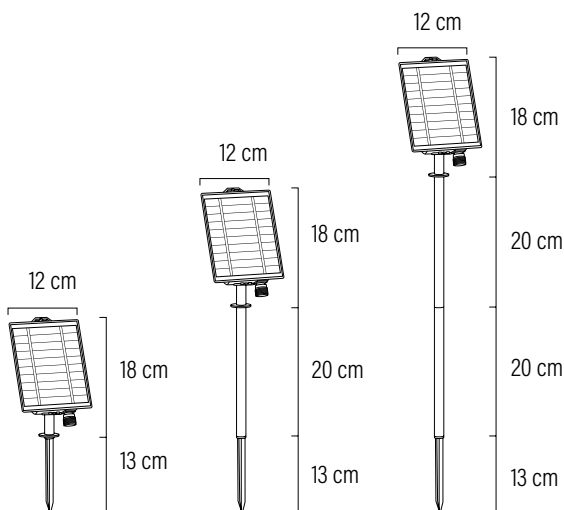

Using solar panels offers all-year-round solutions. No more wall outlets and extension cords; placement opportunities are limitless.

Solar panel and remote control with multifunction. The panel can be placed on the ground or on a wall to get the best exposure to sunlight.

The solar panel can replace the existing transformer. Practical where there is no continuous power supply.

Fits several of Konstsmide's products between 24V–31V for outdoor use and produced from 2017 onwards.

For optimal performance, we recommend following the specified number of LEDs. Our range offers solar panels for 200, 400 and 600 LEDs. Connecting more LEDs than recommended will reduce brightness and usage time.

Remote control with multifunction. Regulate e.g. timers and dimmers with the remote control.

Charge the solar panel before using it. Charge with the included USB cable. Note! Only use the USB cable indoors.

The solar panel has a ground spike that is adjustable to 3 heights. The panel can also be angled so that the sun's rays strike optimally. It's easy to place on the ground or hang on a wall.

Solar panel battery box, can extend up to 200 LEDs with Konstsmide's standard outdoor products with 24V-31V. Can be charged indoors by a USB cable 1.8 m. Ground spike included. Remote with timer, 4/6/8 hours. Dimmer, sensor and multifunction. Light set not included. Batteries and USB cable 100 cm included.

**3776-000**

12 7,8 kg 40 dm<sup>3</sup>

Solar panel battery box, can extend up to 400 LEDs with Konstsmide's standard outdoor products with 24V-31V. Can be charged indoors by a USB cable 1.8 m. Ground spike included.
